

Dhaka Tesla Pool — Final Architecture

en-route pooling on fixed routes · one NestJS API, one PostgreSQL database; seats are protected by a vehicle row lock + database constraints

Passenger screen polls its ride every 3 s (status, car on the route, co-riders, fare)

Delivery

GitHub: feature/* → PR → CI (api · web · docker) → merge · Render: migrate deploy → seed → start · Vercel: Next.js build · Local: docker compose up
